## OBJECTIVE

---

Software Engineering graduate with hands-on experience in Java, Spring Boot, REST APIs, and microservices through Capgemini training. Built and deployed real-world applications, including a microservices-based management system and a live D2C e-commerce platform. Seeking a Java Backend/Software Engineering role to contribute to scalable applications and grow as a software engineer.

## EDUCATION

---

|                                                                    |      |
|--------------------------------------------------------------------|------|
| <b>Bachelor of Technology in CSE</b> , JECRC University (8.5 CGPA) | 2026 |
| <b>Senior Secondary (XII)</b> , RBSE Board (96.80%)                | 2021 |

## SKILLS

---

|                                |                                                                                 |
|--------------------------------|---------------------------------------------------------------------------------|
| <b>Programming Languages</b>   | Java, C/C++                                                                     |
| <b>CS Fundamentals</b>         | OOP, DBMS, OS, Computer Networks, Data Structures & Algorithms                  |
| <b>Backend &amp; Databases</b> | Spring Boot, REST APIs, JWT, MySQL (JPA), MariaDB, PostgreSQL                   |
| <b>DevOps/Tools</b>            | Docker, Kubernetes, Jenkins, CI/CD, Git, GitHub, Linux                          |
| <b>Cloud/Platforms</b>         | AWS (EC2), Vercel, Supabase, ServiceNow, Agile/Scrum fundamentals, Unit Testing |

## EXPERIENCE

---

|                                                                           |                            |
|---------------------------------------------------------------------------|----------------------------|
| <b>Software Engineer Trainee (Training Program)</b><br>Capgemini (Sogeti) | <i>Jan 2026 – Jun 2026</i> |
|---------------------------------------------------------------------------|----------------------------|

- Trained in Java, Spring Boot, and REST API development with JWT-based authentication, and CI/CD with Jenkins and Docker.
- Built a capstone project, a microservices-based Stationery Management System with API Gateway, Auth Service, Eureka discovery, and Config Server.
- Containerized all services with Docker for consistent deployment across environments.

## PROJECTS

---

### Bhoomi and Beyond – D2C E-Commerce Platform ([Link](#))

Next.js, Supabase, Vercel, Razorpay, Claude Code

- Migrated the live storefront from a plugin-heavy WordPress/WooCommerce stack (RAM-limited on AWS) to Next.js, deployed on Vercel, cutting page load time from 5s to 1–2s.
- Built the backend for 18 products on Supabase, covering PostgreSQL schema design, Row-Level Security, Auth, Storage, and Edge Functions.
- Integrated Razorpay for payments with webhook-based order verification and automated order confirmation emails via SMTP.

### CloudPulse – Cloud Resource Monitoring Dashboard ([View on GitHub](#))

C++, Python, Linux, MariaDB, HTML, CSS, ServiceNow, REST APIs

- Built a cloud dashboard monitoring real-time CPU, memory, disk, and network usage, designed to scale across multiple servers.
- Developed REST APIs with Python/Flask, polling system metrics every 5 seconds for real-time data collection.
- Built a responsive UI with live charts, auto-triggering ServiceNow incidents when usage crosses set thresholds.

## CERTIFICATION

---

**Certified Application Developer**, ServiceNow

07 June 2025
